PROFESSIONAL SUMMARY

Experienced AI Research Engineer specializing in Large Language Models, Multi-Agent Systems, and Retrieval-Augmented Generation. Proven track record in developing innovative AI solutions and conducting cutting-edge research in machine learning and natural language processing.

CORE COMPETENCIES

- â€ Large Language Models (LLMs) & Transformers
- â€ Multi-Agent Systems (MAS) & Distributed AI
- â€ Retrieval-Augmented Generation (RAG)
- â€ Reinforcement Learning from Human Feedback (RLHF)
- â€ Deep Learning & Neural Networks
- â€ Python, TensorFlow, PyTorch, Scikit-learn
- â€ Cloud Computing (AWS, Azure, GCP)

KEY PROJECTS

- Step Mentor - AI-powered educational platform with LLM integration
- Multi-Agent Systems Framework - Collaborative AI with CrewAI
- RAG Research Framework - Knowledge-enhanced generative AI
- RLHF Implementation - Ethical AI alignment system
